

Metatranscriptomics

Matthew McCabe and Chris Creevey

Animal & Bioscience Research Department,
Animal & Grassland Research and Innovation Centre,
Teagasc, Grange, Dunsany, Co. Meath,
Ireland.

Why do Metatranscriptomics?

- Primer-free 16S rRNA community analysis
- Measure gene expression
- Look at metabolically active organisms
- Enrich genes for specific organisms

Design

Morning x3
Evening x3

Laboratory protocol

Liquid Nitrogen
Grinding

RNA purification
(RNeasy)

Bead beating

Eukaryotic mRNA

Genomic DNA
degrataion
(Turbo DNase)

Prokaryotic mRNA

illumina TruSeq

epicentre
an illumina company
Ribo-Zero™
ScriptSeq™

Illumina MiSeq

250bp Paired-end

Eukaryotic mRNA

Trimmed to 150bp

Morning 1	1,594,735
Morning 2	1,455,903
Morning 3	1,274,027
Evening 1	1,908,175
Evening 2	1,220,750
Evening 3	787,169

Prokaryotic mRNA

Trimmed to 140bp

Morning 1	1,157,429
Morning 2	1,647,889
Morning 3	2,082,328
Evening 1	2,085,877
Evening 2	1,920,904
Evening 3	1,744,960

Taxonomy PolyA mRNA

Morning

Evening

- Unknown
- Eukaryota
- artificial sequences
- environmental samples

- ssDNA viruses
- Bacteria
- Archaea
- ssRNA viruses

Taxonomy Eukaryotic mRNA

Morning

Evening

■ Ciliophora

■ Metazoa

■ Apicomplexa

■ Fungi

■ Streptophyta

■ Schizopyrenida

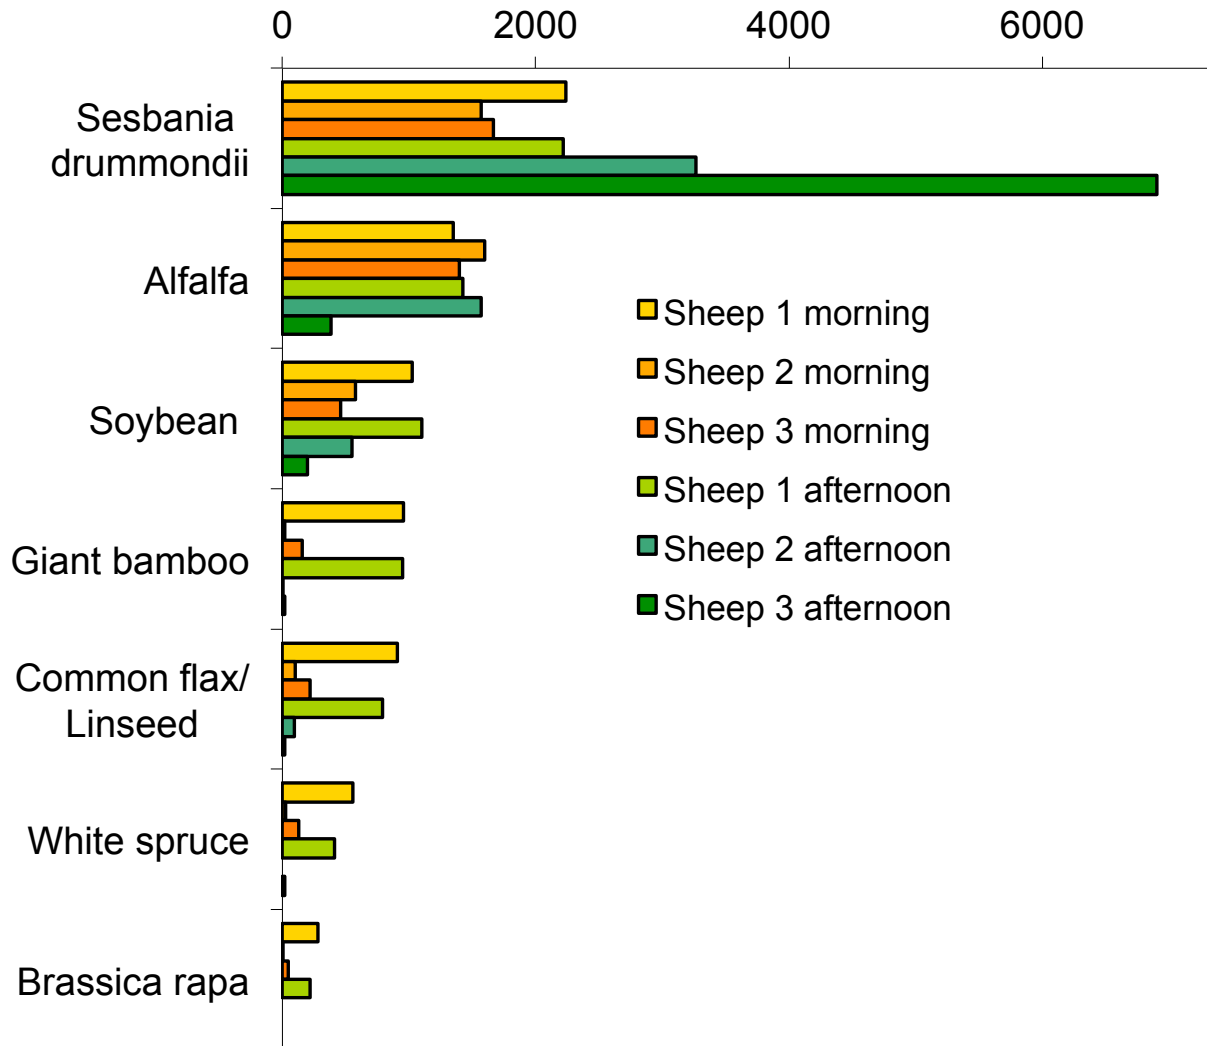

■ Archamoebae

■ Mycetozoa

Plant mRNA abundance

Feed pellet composition

Barley 26%
 Maize gluten feed 22%
 Sugar Beet molassed 14%
 Soya Hull 14%
 Cane Molasses 8.5%
 Soya Extract 7%
 Distillers grains 6%

rRNA versus mRNA

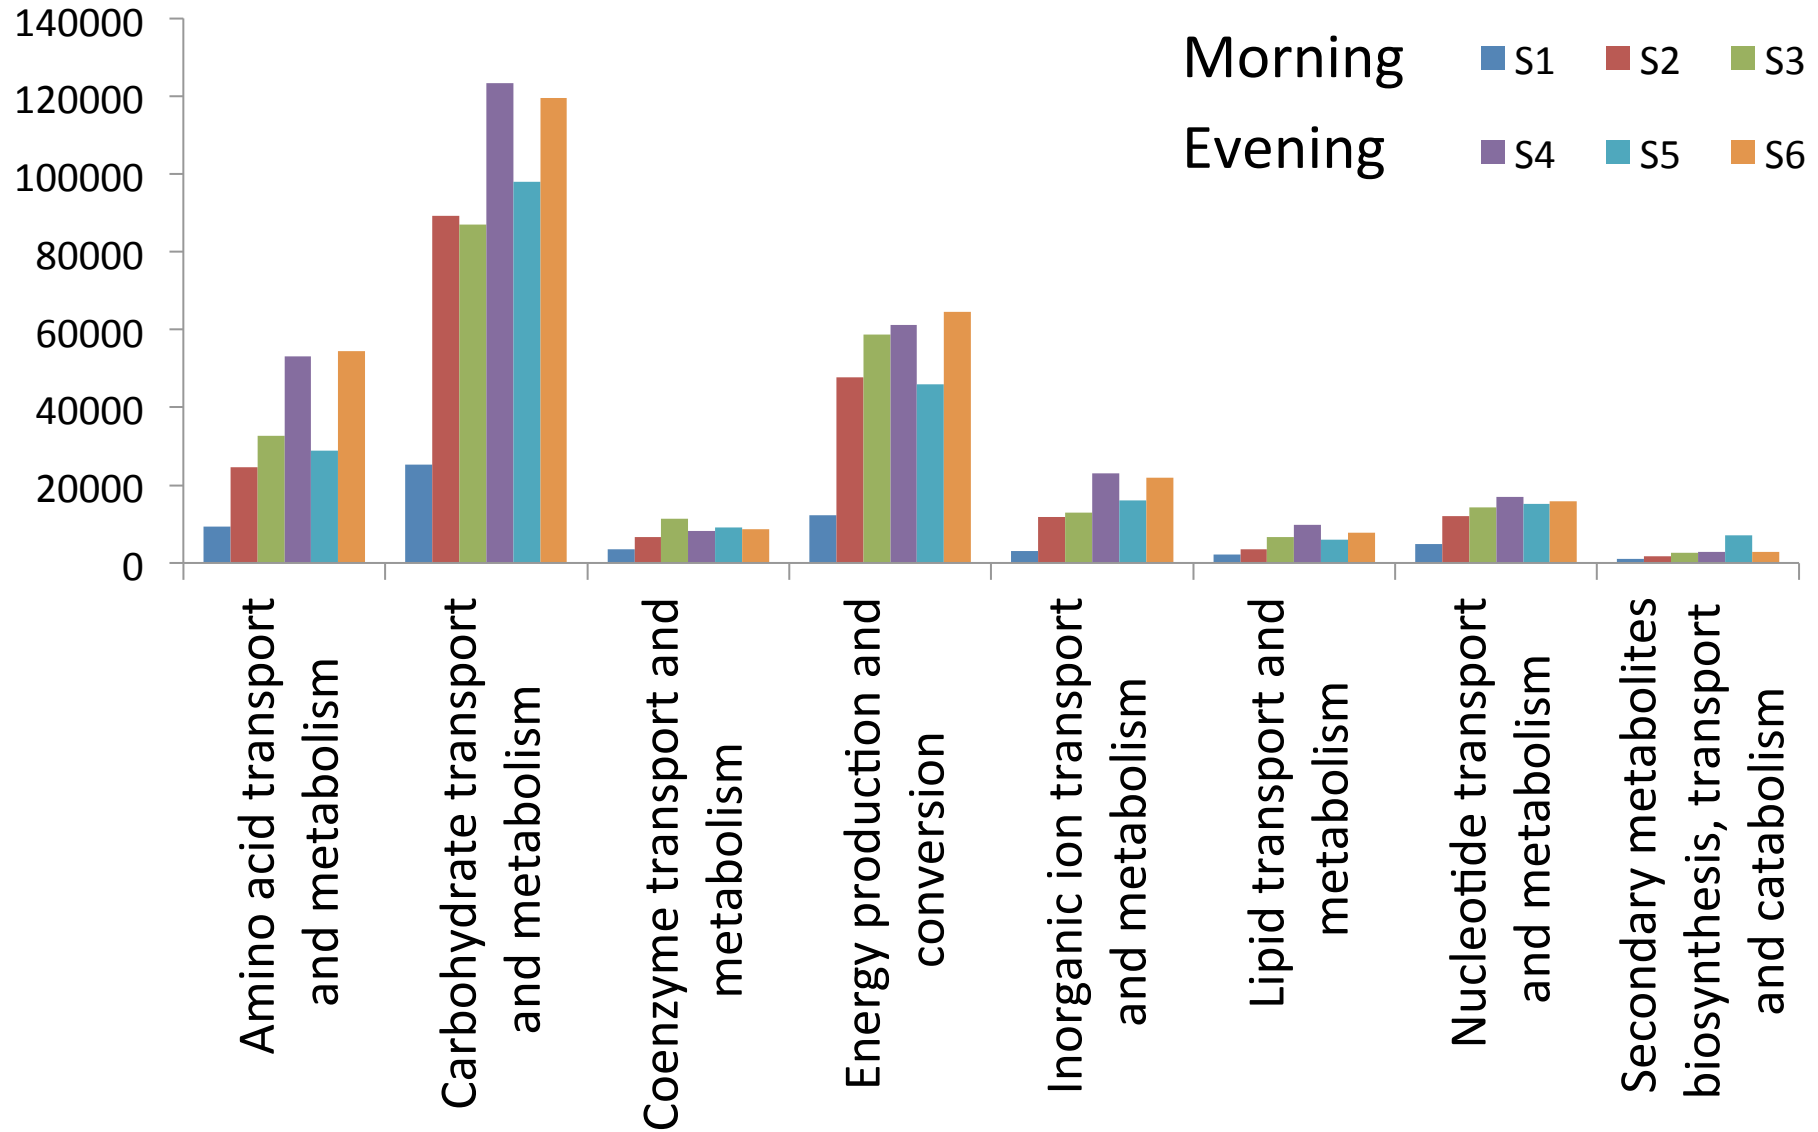

Taxonomy RiboZero mRNA

Prokaryote mRNA Functional Categories

Prokaryote mRNA Metabolic functions

Conclusions

- rRNA over-representation can be dealt with in the lab
 - However bioinformatic approaches are still not optimal
- Species and Functional annotation continues to be a huge problem
 - Requires more genomic information from rumen Microbes
- Even with low coverage sequencing a good snapshot of metabolic functions is possible
 - 800 Euro miSeq run for 6 samples
 - 80 Euro per sample, library prep.
- Unknown genes are going to continue to be a problem and demonstrate how little we really know about the genes expressed in rumen microbial communities.
