

METHAGENE

Questionnaire researcher profile

- 1) Tell us about yourself (Who are you? Where are you from? What is your educational background?)

My name is Troels Kristensen, 59 years old from Foulum in Denmark. I have been working at the National Institute for Agriculture Research – now part of Aarhus University - during more than 30 years

- 2) What is your area of expertise?

Production systems, feeding and pasture management, sustainable livestock

- 3) Where does your focus lie within your current project(s)? (related to GHG/methane)

Development of livestock production from a holistic farm perspective taking into account the interactions between the different components of the livestock system and the management

- 4) What would be the added value for you of joining an international project/network? (such as the METHAGENE network, or the RuminOmics project)

Getting in touch with colleges working with livestock from different perspectives

- 5) What and/or who inspired you to make a career in science?

- 6) What do you enjoy most about your work?

- 7) What is your most stand-out or surprising moment in science so far?
